

Prestige Fence Panels

Quality - Our fencing is manufactured from Western Red Cedar. The Knotty cedar used in the rails as well as the main part of the tongue and grooved panel is pre selected to make sure the knots are sound and tight. The top lattice portion of the fence panels uses only the best of clear cedar material.

Construction - CICP fencing is built and designed like our Premium gold engineered products for maximum strength and performance.

The panels are nailed from both sides using hot dipped galvanized nails. The lattice header is 5/8" thick and is spaced with 1 1/4" openings to ensure privacy. The solid panel boards in the fence are a tongue and grooved smooth face V pattern which provides maximum strength and prevents excessive warping or gaps developing between the boards.

It should be noted that the lattice header sheet acts like a truss and we can guarantee that no sagging will take place as experienced by zero sagging in the 25 years we have been manufacturing and selling this fence panel.

Available Sizes

- A. Widths - 6' and 8'
- B. Standard Heights - 4' / 4' 8" / 5' 8"
- C. Lattice tops can be square or diagonal.

Enquiries for other sizes are welcome...
