

CICPTM

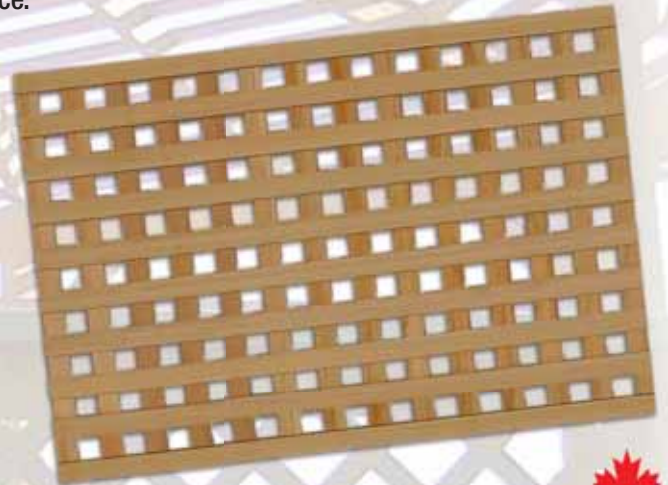

Prestige Lattice Sheets

- PREMIUM GRADE CLEAR CEDAR -

Quality - Our lattice is manufactured from the finest West Coast Clear Cedar that is available in the market place today.

Construction - CICP lattice is manufactured and designed like our "Premium Gold Engineered Products" for maximum strength and performance.

Every panel is opposite angle stapled at every cross joint including the full perimeter of the sheet.

Cross joints are glued with a premium quality exterior grade adhesive where necessary for added strength and stability.

The staples used are high grade aluminum which have the best holding capability for cedar.

These aluminum staples further reduce those ugly stain marks that can show from lesser quality fasteners.

There are no staples used on the face of the lattice sheet thus giving a clean unblemished appearance.
